

R-Shared: A Collaborative Platform for R Code Development and Sharing

8th March 2011

Agenda

- Overview
- Projects that Inspired ...
 - ModSpace
 - Commercial R Support
- Introducing LondonR Ltd!
- The R-Shared Platform
- Summary
- Questions

Overview

Overview

- More teams starting to use R in commercial situations
 - How do these people communicate?
 - Central knowledge sharing
- IT teams needing to work with R:
 - Improve performing with use of hardware
 - Control R versions and packages

Overview

- R used for more and more vital decisions
 - More focus on validation/verification
 - Code control and versioning
- Support framework needed as user base increases
 - R-Help fantastic but not commercial focus
 - Commercial training & support becoming more important

Overview

- Today I will present Mango's "R-Shared" platform
- Builds on other Mango projects
- A "concept" at this stage

Projects that Inspired ...

ModSpace

- Built for Novartis, but owned by Mango
- Knowledge Management system that:
 - Understands the difference between “code” and other files (e.g. documents)
 - Backed by version control system
 - Uses the high performance “Lucene” search
- Used heavily at Mango

News | Reminders(1) | Dashboard

 [New entry : Automated R installation script for Linux](#)
Installs R 2.10 and pre-requisites for rjava, and all required packages for PME 2.4.

step-07-04.sh installs R
step-07-06.sh installs all R libraries
R installation scripts used in PME, installs R and R packages.
Mike Creed, 08-Mar-11 12:08PM

 [New entry : Logging Module for Bash Installation](#)
A modular script that provides logging functionality, which can be included in bash scripts to provide the following:
- api for creating logs: DEBUG, INFO, ERROR, FATAL
- Termination of a proce...
Useful logging script for bash installation script - writes to console and log file, displays errors in colour.
Mike Creed, 08-Mar-11 12:03PM

 [New entry : NONMEM 6 and 7 installation scripts](#)
Installation scripts used by PME to automate the installation of NONMEM 6 and 7. These are modular scripts that can be called with parameters to determine default and custom sizes.

The PME install...

Entry Contents

-  Useful R functions
 -  mango_theme.R
 -  memory_size.R
 -  speeds.R

Overview | Related | History

Name	Useful R functions
Author	Chris Campbell
Description	<p>R memory management seems to be quite good. However, code should be created to make best use of RAM. This function shows the time cost of stretching (cbinding to) a vector rather than populating a planned matrix.</p> <p>This entry now also includes a Mango branded lattice theme and relative speeds of apply, ifelse, factors and subsetting</p>
Assumptions	R
Projects	Not applicable
Keywords	R, memory, lattice
Language	S, R

-  Useful R functions
 -  mango_theme.R
 -  memory_size.R
 -  speeds.R

[Overview](#) [File Preview](#) [History](#)

```
mango.theme <- function(safe = FALSE) {
  mango.palette <- matrix(c(
    c("#F99B0C", "#E8112D", "#00A3DD",
      "#D36BC6", "#C49977", "#00C993"),
    c("#FF9900", "#CC0000", "#0099FF",
      "#996699", "#CC9966", "#66CC99")),
    ncol = 2, dimnames = list(c("Solutions", "CRM", "Finance",
      "Pharma", "Sensory", "Energy"), c("True", "Safe")))
  # define Mango colours
  column <- 1
  if(safe) {column <- 2}
  # toggle true or browser supported colours
  mango.hsv <- rgb2hsv(col2rgb(mango.palette[1:6, column]))
  mango.hsv[2, ] <- 0.3
  mango.light <- hsv(h = mango.hsv[1, ], s = mango.hsv[2, ],
    v = mango.hsv[3, ])
  # create vector of lightened colours
  # saturated colours influence perception of data

  par <- col.whitebg()

  # show.settings() row 1
  par$superpose.symbol$col <- mango.palette[c(6:1, 6), column]
  par$superpose.line$lty <- rep(1, 7)
  par$superpose.line$col <- mango.palette[c(6:1, 6), column]
  par$strip.border$col <- "black"
```

Daiichi Sankyo

- Ongoing Commercial R Support
- Provision of “validated” R build
- Optimisation of R performance
- Performance of regression testing to provide evidence of verification

Daiichi Sankyo

Introducing LondonR Ltd

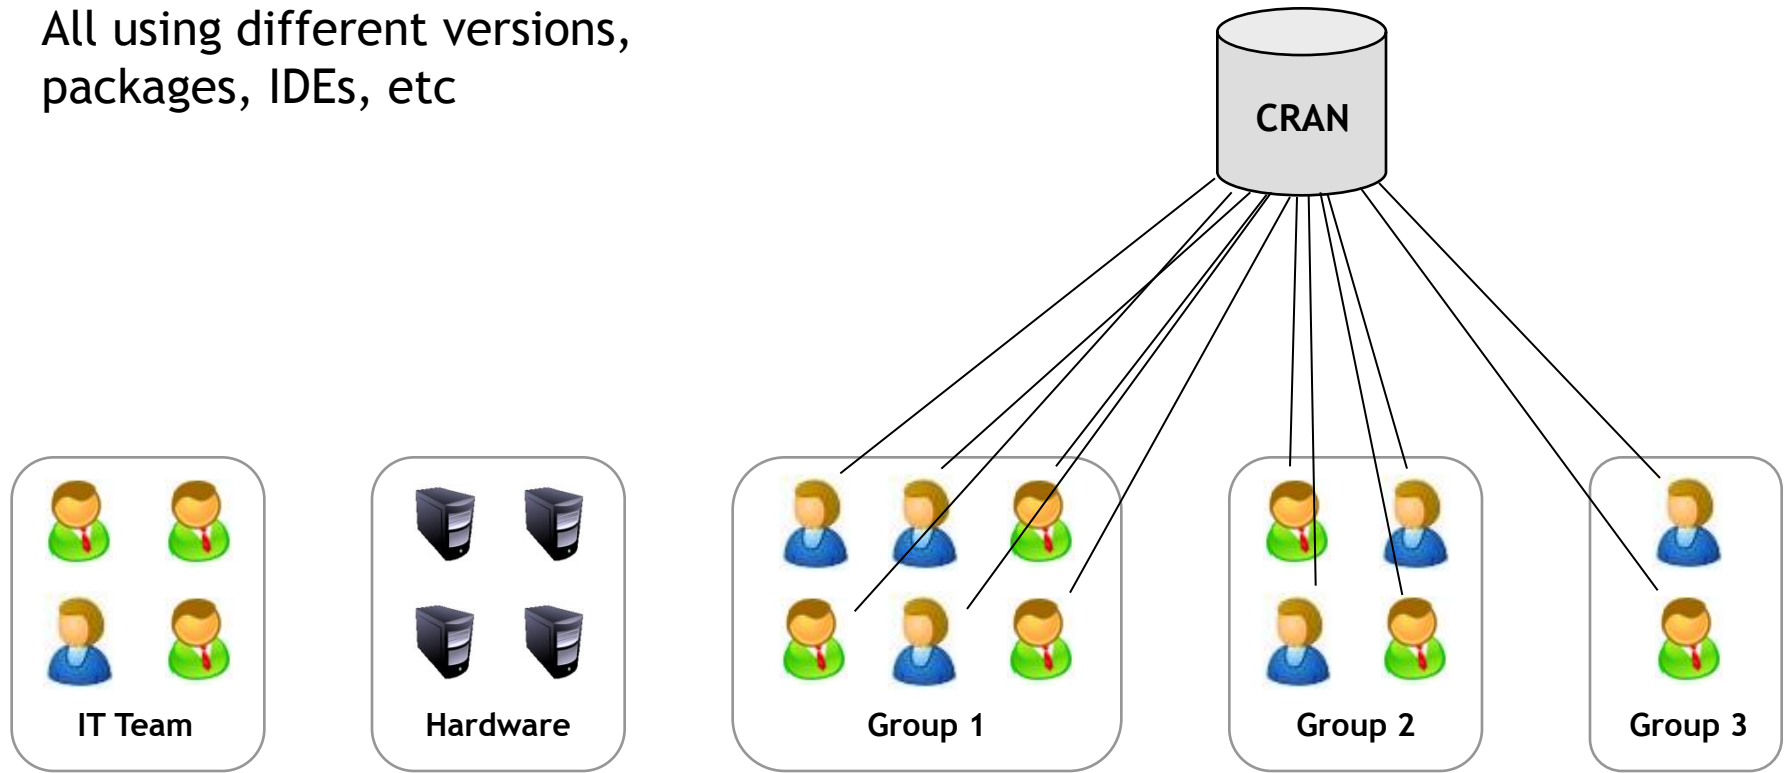

R User Community at LondonR Ltd

Where do they get R?

Most CRAN

All using different versions,
packages, IDEs, etc

R User Community at LondonR Ltd

Where did they get help?

R-Help sometimes

Otherwise they ask each other

R User Community at LondonR Ltd

How about that package that Bob wrote!
Sent around via email
Code maintained on Bob's machine or R-Forge
Everyone has different versions

R User Community at LondonR Ltd

Where do they get training?

Group 1 had a private training course from Mango

Someone from Group 2 went on a public course

Others are self taught

R User Community at LondonR Ltd

Where is their code?

On their own machines mostly

Emailing of scripts

Server to put some code but somewhat disorganised

R User Community at LondonR Ltd

How about some IT support?

IT team is excellent, but don't know R and are not analysts

R is open source, which adds concern

Worried about installing on central servers

They google for commercial support and don't find a lot ...

R User Community at LondonR Ltd

How do the teams communicate?

They don't really (no-one even knows about Group 3)

Sometimes see questions on R-Help

Other potentially see them at LondonR or other events

R User Community at LondonR Ltd

The R-shared Platform

The R-shared Platform

- Integration of the ModSpace software with DSI structures
- On development path at Mango for May 2011
- Looking for interested parties to get involved

Questions

- How do I calculate the risk of an asset within R?
Posted by rpugh on 1st Feb 2011 [See 8 responses](#)
- Does anyone have a script to create a boxplot using the mean as the mid-point of the box instead of the median?
Posted by mcreed on 10th Jan 2011 [See 4 responses](#)

News | Reminders(1) | Dashboard

- New R Package: ggplot2 v1.0.1 now available for use**
Hadley's Wickhams ggplot2 library has now been tested and is available for download
Richard Pugh, 1st Feb 2011 15:30pm
- Feedback: Interactive Graphic Windows**
"Really good video Mike - got any more you can post?" ★★★★★
Jonathan Chard, 30th Jan 2011 10:01am
- New R Training Entry: Interactive Graphic Windows**
Video showing how to set your graph windows to be interactive, allowing you to scroll through plots within the R environment
Michael Creed, 29th Jan 2011 16:05pm
- New Entry: Scripts for Risk Assessment**
Set of basic scripts that can be used to perform a variety of risk assessment tasks
Michael Creed, 29th Jan 2011 15:34pm

Ask Mango a question

Internal Q&A

How about that package that Bob wrote!

It lives in
ModSpace

Can be
downloaded

Can be further
developed by everyone
with access

Updates are announced
in R-Shared

Where do they get training?

Training announcements part of news feed

Group 3

Summary

Summary

- R-shared Platform in development (although there isn't a lot to do!)
- Should be available May/June 2011
- Looking for companies who want to get involved at this stage

Questions
